EDUCATION

Memorial University of Newfoundland (MUN)

B.Eng in Computer Engineering (Co-op Program)

St. John's, NL

Sep 2024 – Apr 2029

- Elected Class Representative, Computer Engineering

AWARDS & SCHOLARSHIPS

Verafin Inc. Computer Engineering Scholarship – \$3,000

Nov 2025

Memorial University Entrance Scholarship – \$2,000

Sep 2024

Most Sportsman Player of the Year – Ice Hockey

2023–2024

Scholar Athlete – High School

2023–2024

PROFESSIONAL EXPERIENCE

Software Engineering Intern

Jan 2026 – Apr 2026

NL Eats Community Outreach Inc.

Remote

- Delivered a full-stack competitions feature spanning database schema design, admin API routes, and dynamic participant-facing views to surface live competition data across the platform
- Enforced code quality as 1 of 4 authorized reviewers on a 13-person team, conducting 10+ pull request reviews to maintain implementation standards across the codebase
- Diagnosed and resolved production-breaking bugs and a series of failing Playwright E2E tests across judge and participant portals to restore platform stability and unblock active development

Machine Learning Team Member

Apr 2025 – Present

Generalis AI, Student Design Team

St. John's, NL

- Build and compare Decision Tree and Random Forest models in Python using Pandas and Scikit-learn to reduce MAE on held-out data and guide model selection
- Maintain an automated pipeline for data loading, preprocessing, model training, and CSV export for the Kaggle Home Data for ML competition to cut manual work and keep results reproducible

Software Team Member

Sep 2025 – Present

Paradigm Engineering, Student Design Team

St. John's, NL

- Designed and implemented an STM32-based steering control system for an autonomous kart, configuring hardware timers to capture 1000–2000 μ s RC PWM signals with microsecond precision and drive a Teknic ClearPath servo motor
- Configured RC control from 6 to 8 channels using a FlySky transmitter and receiver and integrated differential I/O wiring with 5 V enable control for the motor's opto-isolated inputs, ensuring reliable signal interpretation and safer UAV flight testing

ENGINEERING PROJECTS

Air Quality Monitoring System | Arduino, Python, JSON

Oct 2024 – Nov 2024

- Built an Arduino/Python system tracking temperature, humidity, and air pressure with JSON logging, trend graphing, and real-time alerts to support monitoring and historical analysis
- Diagnosed and resolved bugs across sensor inputs, data processing, and alert logic, improving system stability and reducing false alerts

TECHNICAL SKILLS

Languages: Python, C++, TypeScript, C, JSON

Frameworks & Libraries: React, Next.js, Tailwind CSS, NumPy, Pandas, Matplotlib, PyTorch, Scikit-learn, OpenCV

Tools & Databases: Git, GitHub, Supabase, PostgreSQL, Vercel, VSCode, AutoCAD (OnShape)

Credentials: Basic First Aid (2026), Valid Driver's License

EXTRACURRICULARS

Landscaping Technician – Facilities Management, Memorial University of Newfoundland

May–Aug 2025

General Store Associate – Pitches Takeout and Bakery

Jun 2022–Jan 2025

Co-Captain – High School Soccer Team

Sep 2021–Jun 2024

Captain – Trinity Placentia Teepees Minor Hockey Team

Sep 2022–Apr 2023
